You need to change the timestamp option from **NOW** to **UNIX\_TIMESTAMP** from the dropdown. so it will save the timestamp value in table.

- Status changed from Submitted to Code revision needed

If you are saying that the admin is going to have to manually change this every time a database record is edited, that is not an acceptable solution.

Fixed.

**#4 - 03/02/2021 12:19 AM - Kevin Zaleski**

- Status changed from Submitted to Code revision needed

I followed the exact steps above and got the same error. Please test it before submitting again.

Go ahead and add this line to notes:

1/29/21 - apparently we neglected to renew this domain in Feb 2020, canceling future renewals

Please re-test again. somehow the code was reverted to old state. Just fixed and it seems works.
