

## Hosting Masters - Bug #1737

### fix various small issues

12/06/2022 04:11 AM - Kevin Zaleski

<b>Status:</b>	Code revision needed	<b>Start date:</b>	12/05/2022
<b>Priority:</b>	High	<b>Due date:</b>	
<b>Assignee:</b>	Thom Ho	<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			

#### Description

On <http://www.hostings.com/contact.htm>

- 1) Remove the space in front of "Norwalk".
- 2) Change "Contacting Us" to "Contact Us".
- 3) Change "Contacting Hosting Masters" to "Contact Hosting Masters".
- 4) Change "Technical Support" to <a href="mailto:support@support-central.org">Technical Support</a>

On <https://hostings.com/securemsg.php>

- 1) Remove " (optional)" from "Domain name that this message involves (optional)".
- 2) Figure out why no email gets put in the hostings mailbox.  
I no longer get anything sent to [sales@hostings.com](mailto:sales@hostings.com) or [billing@hostings.com](mailto:billing@hostings.com)  
Everything sent to hostings.com should be redirected to [hmspamfree@gmail.com](mailto:hmspamfree@gmail.com) but I am not getting test messages sent to those addresses.  
This used to work OK.

On <https://hostings.com/thankyou.htm>

- 1) Remove these things:

# Thank You!

We will be responding soon.

If you want to drive more traffic to your site,  
this tool will quickly submit your pages to hundreds of thousands of sites...

Enter discount code "hostings" for 15% off 150 varieties of quality groundcovers (ivies, perennials, grasses, daylilies, vines...) at [Classy Groundcovers](#)

Accept E-gold on your site and attract new customers that prefer to pay with a gold-backed electronic currency. It's quick, easy and cost effective - click the graphic to learn how you can benefit and sign up today (signup is [FREE](#)).

## History

#1 - 01/07/2023 01:59 PM - Thom Ho

everything is fixed except for the mail server. I am on it and we need to setup the new mailsrver

#2 - 01/07/2023 02:00 PM - Thom Ho

- Status changed from Assigned to Submitted

#3 - 01/09/2023 06:30 AM - Kevin Zaleski

What do you mean by "need to setup new mailsrver"?

1 and 3 above are fixed, need securemsg to work.

#4 - 01/09/2023 06:31 AM - Kevin Zaleski

- Status changed from Submitted to Code revision needed

#5 - 06/11/2023 06:41 PM - Kevin Zaleski

A) <https://hostings.com/securemsg.php> does not work (no email received by admin).

B) Change the support email on <http://hostings.com/support.htm> from [support@support-central.org](mailto:support@support-central.org) to [support@support-central.net](mailto:support@support-central.net)

c) Fix this: Gmail has detected that this message 550-5.7.1 does not meet IPv6 sending guidelines regarding PTR records and 550-5.7.1 authentication. For more information, go to 550 5.7.1 <https://support.google.com/mail/?p=IPv6AuthError>
